NPL 640

With generous internal heights of 4.3" to 5.5", these high-profile Bread Basket systems are designed for the efficient flow of bread and baked goods throughout the supply chain...from the bakery to grocery stores, mass merchandisers, restaurants, and convenience stores. When full, these bakery trays stack securely for easy transport and merchandising. When empty, they cross-stack and nest for back room and truck space savings. Combine with plastic pallets and dollies for a full system to quickly move, store, ship, and merchandise all types of bakery items from bakery to retail. These plastic trays are fully recyclable at the end of their service life. Asset tracking systems are available to reduce loss.

Can be made with
Recycled Plastics

- 26 x 22 footprint
