Leaving Our Mark on Your Bottom Line

DayMark® is a registered Trade Mark of CMC DayMark® Corporation

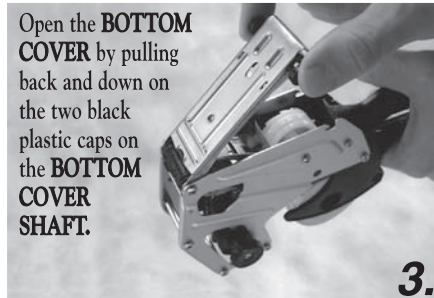

LOADING INSTRUCTIONS

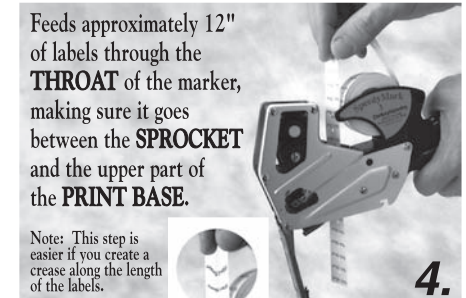

Pull open **LABEL HOLDER ARM** by pulling slightly towards you and then upwards.

Place the **LABEL ROLL** onto the **LABEL SPINDLE** and shut the **LABEL HOLDER ARM**.

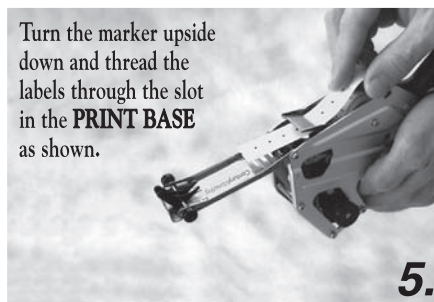

Open the **BOTTOM COVER** by pulling back and down on the two black plastic caps on the **BOTTOM COVER SHAFT**.

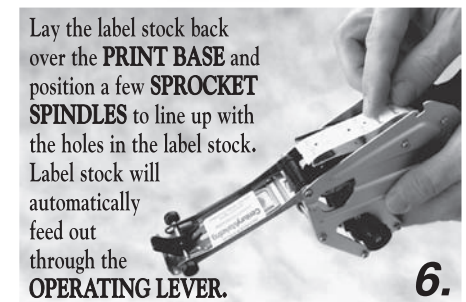

Feeds approximately 12" of labels through the **THROAT** of the marker, making sure it goes between the **SPROCKET** and the upper part of the **PRINT BASE**.

Note: This step is easier if you create a crease along the length of the labels.

Turn the marker upside down and thread the labels through the slot in the **PRINT BASE** as shown.

Lay the label stock back over the **PRINT BASE** and position a few **SPROCKET SPINDLES** to line up with the holes in the label stock. Label stock will automatically feed out through the **OPERATING LEVER**.

Shut the **BOTTOM COVER**.

Squeeze and release the **OPERATING LEVER** to dispense labels.

DIALING THE PRICES

Pull the knob out to line up the arrow on the **DIAL SHAFT** with the appropriate band. Push back when the character is set.

ADJUSTING THE PRINT HEADS

Loosen both **HEAD ADJUSTMENT SCREWS** on the print head. Move the print head either forward to line up the copy on the label. Tighten the screws.

CHANGING THE INK ROLLER

Lift the **INK ROLLER HOLDER** slightly away from the marker and lift up until it is clear of the **INK ROLLER**. Lay the marker on its side over a waste receptacle to "drop" out the old ink roller.

Carefully slide the new **INK ROLLER** back onto the **INK ROLLER SHAFT** and slip the **INK ROLLER HOLDER** back to its original position.

ADDITIONAL LABELS AND INK ROLLERS MAY BE PURCHASED BY CALLING 800-847-0101.

Trouble Shooting

Problem:	Check the following:
• Labels are not advancing	Make sure sprocket is advancing. Clean off the adhesive buildup on the sprocket or print base
• Printing is too light on one side of the label	Make sure the ink roller and ink roller holder is making contact with the heads in a uniform manner.
• Numbers not printing clearly	Clean the bands with a soft, dry brush. Lint, mixing with ink, will create a buildup on and around the characters on the bands; or replace ink roller .
• BOTTOM COVER will not open	It may be caught on the side plates which may need to be slightly pulled outward.
• Printing looks too high/low on labels	Adjust the head forward or backward.
• Printing hits between two labels	Reload the labels for correct alignment on the sprocket .
• INK ROLLER will not spring back up	Check the springs to be sure they are operating on the ink roller holder .

3 OPERATING INSTRUCTIONS

DayMark Lifetime Guarantee

DayMark will repair and recondition your date coding markers as long as labels and ink rollers are being purchased from DayMark.

DayMark's replacement policy requires our customers to send in the marker needing reconditioning first, before a replacement marker is issued.

Detailed Instructions:

- Call your customer service representative at 1-800-847-0101 to request a replacement marker.
- A Return Authorization Number (RA#) will be assigned for your return.
- Label your box for your DayMark marker return .
- Upon receipt of the return marker, DayMark will ship a replacement marker to you within 24-48 hours. DayMark markers with "special band layouts" will require a longer lead time.
