

Tug & Tote Rack System Overview

The Tug & Tote racking system is modular and designed to support the TNTURHBP rack head, which holds the bags. The TNTURHBP head can be directly mounted to the display case. In addition a variety of bases and predrilled connectors enable a custom fit for nearly all applications. Installation can be handled in-house by most stores with no more tools than a drill-driver, a few sockets and screwdriver bits.

TNTSMPV

The TNTSMPV Side Mount Pipe-Vertical is used on the side of tables, crates and bins. The finished installation consists of the TNTSMPV base, an extension, TNTEXTTUBE, and the TNTTOP adapter. A TNTURHBP is then mounted on the TNTTOP.

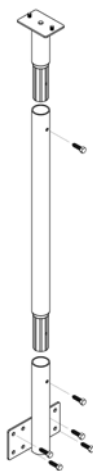

TNTSPA

The TNTSPA Straight Pipe Adapter is used as a table mount on horizontal surfaces. The finished installation consists of the TNTSPA base, an extension, TNTEXTTUBE, and the TNTTOP adapter. A TNTURHBP is then mounted on the TNTTOP.

TNTSMPH

The TNTSMPH Side Mount Pipe-Horizontal is used on the side of tables, crates and bins. The finished installation consists of the TNTSMPH base, an extension, TNTEXTTUBE, and the TNTTOP adapter. A TNTURHBP is then mounted on the TNTTOP.

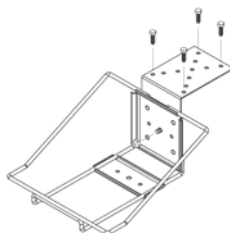

TNTFLOOR

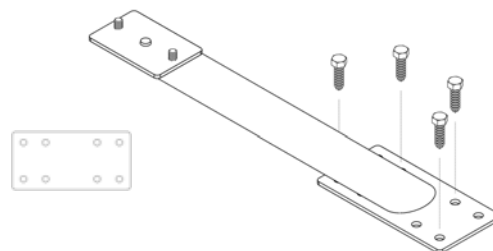

The TNTFLOOR Floor Stand is used where other table, bin or bunker mounts are not possible or desired. The finished assembly consists of a TNTFLOOR base, (3) extensions TNTEXTTUBE, and a TNTTOP adapter. A TNTURHBP is then mounted on the TNTTOP.

TNTTMA

The TNTTMA Top Mount Adapter is used to attach the TNTURHBP Universal Rack Head to the front of a produce case without drilling holes in the front side of the case.

TNT45ABM

The TNT45ABM Angled Bunker Mount is used to mount the Universal Rack Head on bunker display cases.
