

Designed for food safety and savory, tasty results when roasting meat or poultry, the new CDN ProAccurate[®] Meat/Poultry Ovenproof Thermometer (IRM200-GLOW) features a glow-in-the-dark dial that makes it easy to see in the oven.

This new model is extremely easy to use, with an extra large 2-inch (5.1 cm) dial with a durable laboratory glass lens, and a 5-inch (12.7 cm) stainless steel stem. It is waterproof and features a handy temperature guide and target range indication to take the guesswork out of roasting.

The CDN ProAccurate[®] Meat/Poultry Ovenproof Thermometer stands out as a value over time, because it can easily be recalibrated with a simple boil test. This means that the consumer can count on accurate temperature readings year after year.
