

Ice Maker Water Filtration 3M Water Filtration Products

3M Water Filtration Products offers single cartridge water filtration systems that help provide consistent high quality water for commercial ice makers.

Model ICE125-S combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 10,000 gallons at a flow of 1.5 gpm.

For Ice Makers up to 750 pounds

Product benefits

- Effectively reduces sediment and chlorine taste and odor for better equipment protection and clearer, great tasting ice.
 - Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
 - Built-in scale inhibitor reduces lime scale build-up on evaporator plates
 - Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - 3/8" FNPT horizontal inlet and outlet ports
-

Model ICE165-S combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 35,000 gallons at a flow of 3.34 gpm.

For Ice Makers up to 1400 pounds

Product benefits

- Effectively reduces sediment and chlorine taste and odor for better equipment protection and clearer, great tasting ice.
 - Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
 - Built-in scale inhibitor reduces lime scale build-up on evaporator plates
 - Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - 3/8" FNPT horizontal inlet and outlet ports
-

Model ICE195-S combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 54,000 gallons at a flow of 5 gpm.

For Ice Makers up to 2100 pounds

Product benefits

- Effectively reduces sediment and chlorine taste and odor for better equipment protection and clearer, great tasting ice.
 - Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
 - Built-in scale inhibitor reduces lime scale build-up on evaporator plates
 - Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - 3/8" FNPT horizontal inlet and outlet ports
-

Coffee Maker Water Filtration 3M Water Filtration Products

3M Water Filtration Products offer single cartridge water filtration systems that help provide consistent high quality water for the perfect cup of coffee or tea.

Model Brew 105-MS combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 1,500 gallons at a flow of .75 gpm.

For up to 3000 ½ gal pots in 6 months

Product benefits

- Consistent great tasting brewed coffee and tea from water with reduced sediment and chlorine taste and odor.
- Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
- Reduced scale formation by the controlled release of proprietary scale inhibitors
- Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
- Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
- 3/8" FNPT horizontal inlet and outlet ports

Model Brew 115-MS combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 3,500 gallons at a flow of 1 gpm.

For up to 7000 ½ gal pots in 6 months

Product benefits

- Consistent great tasting brewed coffee and tea from water with reduced sediment and chlorine taste and odor.
- Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
- Reduced scale formation by the controlled release of proprietary scale inhibitors
- Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
- Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
- 3/8" FNPT horizontal inlet and outlet ports

Model Brew 135-MS combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 3,500 gallons at a flow of 1.67 gpm.

For up to 28,000 ½ gal pots in 6 months

Product benefits

- Consistent great tasting brewed coffee and tea from water with reduced sediment and chlorine taste and odor.
 - Certified by NSF Standard 42 and/or FDA CFR-21 compliant materials
 - Reduced scale formation by the controlled release of proprietary scale inhibitors
 - Patented valve-in-head design simultaneously shuts off water and vents water, allowing for simple and virtually trouble-free cartridge change-outs without the need to shut off the upstream feed water
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - 3/8" FNPT horizontal inlet and outlet ports
-

Scale Reduction Water Filtration 3M Water Filtration Products

3M Water Filtration Products SF165 ScaleGard HT system helps provide consistent Recipe Quality Water with reduced sediment and chlorine taste and odor. Operating cost savings from the controlled and metered additions of scale-inhibitor that reduces the ability of calcium and magnesium to precipitate as hard scale in both high and low temperature applications, including ice machines, coffee, tea and steamers.

Model SF165 combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 35,000 gallons at a flow of 3.34 gpm.

For equipment with water flow rates up to 3.34

Product benefits

- Superior scale reduction performance in equipment from ice machines to equipment heating water to temperatures over 200 degrees
 - FDA CFR-21 compliant materials
 - A forced-feed orifice carefully controls and meters the additions of proprietary scale inhibitor to reduce scale build-up on heating coils
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - 3/4" NPT horizontal inlet and outlet ports
-

3M Water Filtration Products Model SF18 helps Inhibit scale build-up and corrosion in high –temperature foodservice equipment, including coffee brewers, boiler-based steamers and hot tea. A proportioning forced-deed orifice delivers a carefully metered amount of unique high-temperature scale inhibitor, sequestering the hardness minerals ant form on boiler walls, sensors and heating coils.

For equipment with water flow rates up to 8 gpm

Product benefits

- Superior scale reduction performance in equipment from ice machines to equipment heating water to temperatures over 200 degrees
 - FDA CFR-21 compliant materials
 - A forced-feed orifice carefully controls and meters the additions of proprietary scale inhibitor to reduce scale build-up on heating coils
 - Sanitary Quick Change (SQC) encapsulated cartridge design allow for fast and easy cartridge change-outs with a ¼ turn
 - Stainless Steel head
 - 3/4" NPT horizontal inlet and outlet ports
-

9000 Series Water Filtration 3M Water Filtration Products

3M Water Filtration Products line of 9000 series cartridges are an economical way to provide the benefits of 3M Water Filtration in a competitive systems without incurring additional capital expenses. The 9000 Series cartridges do not require activation for functionality, allowing an operator to change the cartridge in seconds.

Product benefits

- Specifically designed to fit in competitive systems to enhance performance and provide
- Fits competitive (Everpure) systems
- No Pre-activation required
- FDA CFR-21 and/or NSF compliant materials

Model CFS9112-S is a replacement for the competitive Insurice 2000 series cartridges- It combines chlorine taste and odor reduction with sediment and scale reduction while reducing the effects of chlorine corrosion and hard scale build up for up to 10,000 gallons at a flow of 1.5 gpm.

Model CFS9110-S is a replacement for competitive (Everpure) cartridges when scale reduction and sediment reduction are desired but NOT chlorine or chemical reduction. The cartridges reduction sediment and has scale inhibition only. The CFS9110-S has a flow of 1.5 gpm.

The model CFS110 is a 5 micron sediment reduction. The Progressive Porosity and external grooves give this filter very high sediment capacity. It is normally use as a Pre-Filter and can fit into most 10" size sumps.
