

Step-by-Step Instructions:

HU999-3, -4, -6 Sneezeguards

COMPONENTS (left to right):

Wing nut with screw, rubber feet (4), washer (8), chrome wingnut, pressure washer, (2) and nylon thumbscrews (not pictured).

STEP ONE:

Place all four rubber feet on frame

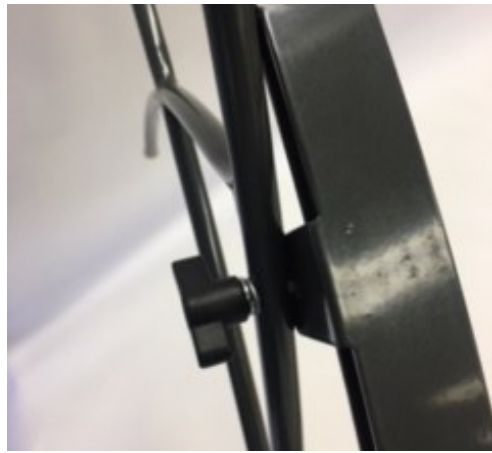

STEP TWO:
Take the wingnut with screw and slide in the pressure washer first, followed by two washers.

STEP THREE:

Slide the assembled wingnut with screw and washers into the desired height hold on the sneezeguard

STEP FOUR:
Take the bracket and slide it through
the wingnut screw.

STEP FIVE

Take 2 washers and one pressure
washer and slide in the wingnut screw
after the bracket is in place.

STEP SIX:
Take the chrome wingnut and slightly
tighten mechanism, do not tighten
completely yet.

STEP SEVEN:
Repeat steps 2-6 on other side.

STEP EIGHT:

Slide sneezeguard and center it with
the bracket, top to bottom.

STEP NINE:

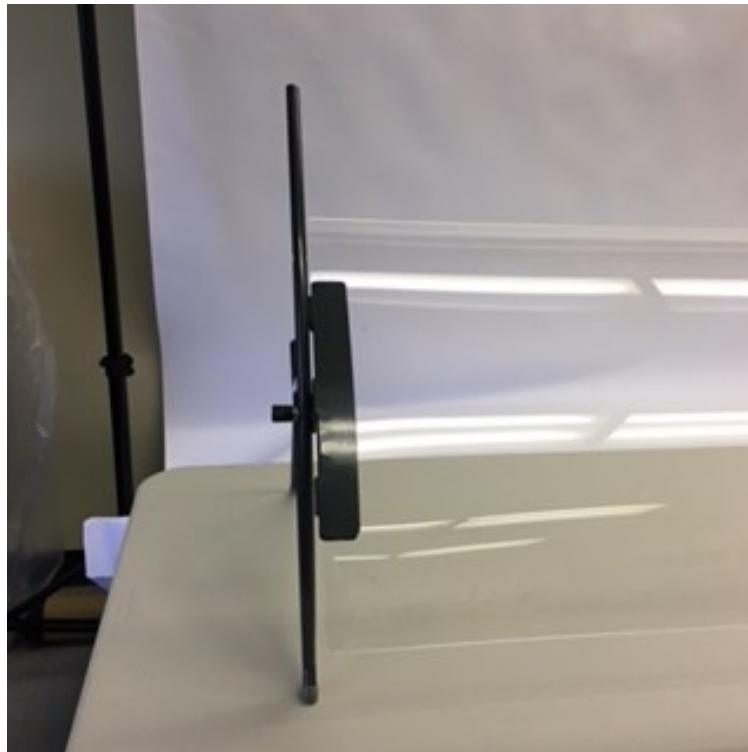

Take 2 thumb screws and tighten the sneezeguard in place on the first side. Repeat on other side. Do not use any tool, tighten by hand.

STEP TEN:

Once sneezeguard is attached to brackets on both sides, tighten the wingnut screw completely to the desired angle.

THAT'S IT!
