

Cam GoBox®

Cambro's latest line of insulated transporters are ideal for caterers looking for an ultra-lightweight transporter that offers superior temperature retention to protect food safety and excellent durability to withstand heavy commercial use, all at a budget-friendly price. Just take them and go!

CAMBRO
TRUSTED FOR GENERATIONS™

Cam GoBox®

Cambro's latest line of ultra-lightweight and durable EPP transporters offers budget-friendly solutions for caterers starting out, looking to fulfill shorter-term contracts or expanding delivery services. Cam GoBoxes are also ideal for expanding current menu offerings with minimal expense all while maintaining the same high quality in food and temperature retention that foodservice operators around the world have trusted Cambro with for over 60 years.

Food Safety

Keeping your operation safe is mandated, but it doesn't have to be difficult. At Cambro, we design all of our products with food safety in mind. They must pass our own critical StoreSafe® requirements which support HACCP guidelines for food safety before they can be introduced to the marketplace. Key factors that our products must be able to help foodservice operators are:

- Time and temperature abuse
- Reducing potential cross-contamination
- Ease of cleaning

Cam GoBoxes will ensure that food stays at safe temperatures below 39.2°F or above 149°F for many hours during holding and transport. Use them with our Camchillers® and Camwarmers® to extend cold and hot holding time even further. Also, Cam GoBoxes, when used together with our GN pans and covers, provide the best solution to keep both food protected and your transporter clean and free of any potential cross-contamination.

Cam GoBox® – Top Loader

Line your Cam GoBox with a Cambro GN Food Pan and Seal Cover for the ultimate food safety solution. Cambro GN pans protect food and carrier to support HACCP compliance.

EASY LOADING AND UNLOADING
Interior wall recesses make loading and unloading easy for both GN 1/1 as well as 1/2 pans.

EASY IDENTIFICATION
A built-in label area keeps plastic menu tags (included for EPP300 and EPP400) in place for easy content identification or routing. StoreSafe® Labels can also be used with Cam GoBoxes.

Unique design allows inter-stacking,

**SAVING
30%**
storage space.

ERGONOMIC HANDLES
Comfortable handles allow easy and safe lifting of the GoBox.

Cam GoBox top loading carriers are designed with enough room to hold GN 1/1 pans along with Camwarmers® or Camchillers®, if desired.

STACKABILITY
Cam GoBoxes inter-stack and also stack with other major EPP brands.

Lightweight – Made of EPP (Expanded Polypropylene) – an eco-friendly high performance foam material.

Chemically Inert – unaffected by oil, grease and most chemicals.

Excellent Energy Absorption – can withstand substantial impact without damage.

Great Structural Strength – capable of handling significant loads while maintaining its shape and form.

Dishwasher safe.

Safe for food contact.

100% Recyclable, CFC-Free.

Note: Best results will be achieved by loading food pans between 180° to 190°F. Loading metal food pans over 250°F will result in damage to the carrier.

Cam GoBox® – Front Loader

4-SIDED HANDLING

Thoughtfully designed built-in handles along the top of the front loader units allow them to be easily carried from all four sides.

GENTLE OPEN AND CLOSE

Beveled door edges ensure door can be easily closed and latched.

DRIP-RESISTANT

Built-in condensation barrier helps front loaders to remain drip-resistant.

EASY IDENTIFICATION

A built-in label area keeps plastic menu tags (included for EPP300 and EPP400) in place for easy content identification or routing. StoreSafe® Labels can also be used with Cam GoBoxes.

FULL 270° ACCESS

Durable hinges and latches allow the door to open 270° and remain open securely to the side of the front loader for easy access to products. Latches keep door securely closed during transport.

Cam GoBox front loading carriers are designed with enough room to hold GN 1/1 pans along with Camwarmers or Camchillers, if desired.

Note: Best results will be achieved by loading food pans between 180° to 190°F. Loading metal food pans over 250°F will result in damage to the carrier.
