

Now, for safer hot or cold food delivery over a longer period of time CarryHOT&COLDusa™ introduces our **NEW** Hot/Cold Gel Packs (HCP).

Safe, non-toxic and FDA approved.

Larger, 48-ounce or 160 ounce thermal mass for longer protection.

Can be used as a Hot Pack: Microwave for up to 3 minutes or can also be boiled for up to 5 minutes. Polypro handle makes removing heated pack from microwave safer (packs can be ordered without handles for heating in boiling water or in a steamer.)

CAUTION: Do not over heat or over boil- overheating may cause product failure.

Can be used as a Cold Pack: For maximum performance, place in freezer three hours before use.

Each gel pack offers safer, double anti-leak protection. Each is sealed in a strong 4 oz. inner liner and protected by a 12 oz. tear proof red and blue outer TriGuard® shell.

The gel packs can be cleaned and sanitized in a bleach water solution or in a commercial dishwasher for a longer lasting professional appearance.

A hang loop is built in for safer removal of heated packs and for easy air drying.

For best results use with CarryHOT&COLDusa™ brand insulated food transporters.

Satisfaction guaranteed
