# Timers

For people on the go, or have limited space, Cooper has two smaller profile units for numerous tasks.

Model TS100

Weighing 1.5 ounces, the popular TS100 timer/stopwatch is never far from your reach. With its 18" soft nylon cord, the user can keep this timer hanging around their neck for easy access. For ease of use, the TS100 was designed with a simple 3-button function: minutes, seconds, and start/stop. For repetitive timing, the recall feature automatically brings the counter back to the previously set time. Ideally suited for: cooking, laboratories, HVAC repair, sporting events, and just about anywhere where time measurement is an essential part of the job.

Features

- Timer/stopwatch capabilities

- 18" nylon cord

- Recall feature, returns to previously set time

- 99 min, 59 sec counter/timer

Model TCS24

The TCS24 is a multi-function unit with clock, timer, and stopwatch all in one. This pocket sized timer is light enough to carry or clip on your shirt or coat pocket without being cumbersome. Designed to perform a varied number of tasks, this unit may be mounted to a metal surface via its magnetized back or placed on a counter top with its easel stand. Ideal for numerous applications where time measurement is critical such as, kitchens, laboratories, testing facilities, classrooms, HVAC technicians, and processing plants.

Features

- Clock/timer/stopwatch

- Counts up or down in 1-second intervals

- 24-hour capabilities
