

Edlund Helios™ UV-C Sterilizer Cabinet

Our patented KSUV-18 Sterilizer Cabinet has been proven to provide superior sterilization for knives and other kitchen utensils compared to other methods or similar products that use magnetic bars or metal racks to secure those items. Our exclusive non-filtering clear slotted knife holding rack and special mirrored interior walls eliminate any shadows on knife surfaces within the cabinet and force the powerful UV-C light to bounce and reach every surface, providing complete sterilization. The easy to operate mechanical timer can be set for up to 15 minutes, indicating when sterilization is in process, but the KSUV-18 will safely sterilize your utensils in under 4 minutes with 99% efficacy.** It's like a SPF-99 (Sterilization Protection Factor) for your knives.

Now, with the emergence of the corona virus, customers tell us they are also re-purposing the power of the UV-C light in an attempt to sterilize masks for re-use. While Ultraviolet Germicidal Irradiation has shown excellent results in tests on other, "similar" viruses, the CDC has not yet provided data on UV tests of COVID-19, and Edlund company cannot guarantee its effect for this purpose. However, we are hopeful their testing will indicate similar success.

- Includes NSF Certified Component holding rack model UVKR-18
- 15-minute belled timer
- Holds up to 12 knives plus steel* or up to 8 masks separated for complete surface coverage
- Stainless steel construction
- LED lights indicate when door is closed, and sterilization is in process

- UV filtered plexiglass door with lockable keyed handle
- Exclusive non-UV filtering slotted knife or mask holder
- Made in U.S.A.
- 2 Larger slots to accommodate cleavers
- 115 volts
- Safety interlock door
- **99% effective in under 4 minutes (on tests with knives)
- Follow CDC guidelines for mask use

Edlund shines a new light on Equipment sterilization!

****Independent laboratory testing indicated 99% reduction in E. coli bacteria on knives**

Keyed lockable handle provides added security

FILTERED Plexiglass door protects operators from UV rays while allowing full view of knives or masks inside

**Dimensions: Width 19" (483mm)
Height 24" (610mm)
Depth 6" (150mm)**

Exclusive non-UV filtering holding rack and mirrored interior walls eliminate shadows on all knife surfaces which provides 99% sterilization. Knife/Mask holder can accommodate 12 knives plus one steel or up to 8 masks separated for complete surface coverage. (depending on mask size)
