

HOW TO REPLACE THE INNOSEAL REFILLS:

To LOAD the Innoseal® Bag Sealer, please follow the diagram below.

How to replace the refill:

Paper roll side

Tape roll side

1. Load tape sticky side up - tape end hangs outside the casing
2. Paper travels through the paper channel into one of the wheel ports
3. Advance the wheel counter clockwise until the paper fits into one of the ports
4. Close the Innoseal® Bag Sealer

Note: The first seal is lost, as the tape must attach to the paper. You have correctly fitted the new paper and tape roll if on the second closing you have a tape and paper seal. If not, then retrace above steps.
