DETAILS

Kratos Reach-in Refrigerators and Freezers are designed to withstand the demands of commercial use for years to come - all without sacrificing quality or efficiency. This solid door reach-in has a bottom-mounted compressor, which is perfect for hot kitchens. That's because the colder air near the floor is taken in rather than hot, possibly grease-laden air that you might see in kitchens with grills or fryers. This keeps your cooler from having to work overtime to keep food at proper temperature. These units help to enhance any commercial establishment with their sleek stainless steel exteriors, LED lighting and digital temperature displays.
