Insect Inn Ultra II ™

Paraclipse®

The Insect Inn Ultra II™ is a patented, long-lasting fly control system that utilizes UV light and an exclusive auto-advancing glue cartridge to capture insects permanently. The decorative cover looks like a wall sconce, but it discreetly keeps flies and other insects out of sight as they accumulate on a pheromone-enhanced adhesive strip that is automatically wound within a cartridge for a full 60 days. Paraclipse ® offers a no touch solution to remove trapped insects from the unit that is unlike inferior glue boards.

Features:

✸ **Non-toxic.**

✸ **No pesticides.**

✸ **No insecticides.**

✸ **No touch glue surface.**

✸ **Eliminates large quantities of flies.**

✸ **Audible alert to replace used cartridge.**

✸ **Looks like a decorative wall sconce.**

✸ **Meets USDA & FDA guidelines.**

✸ **Draws flying insects to trapping surface and keeps them trapped.**

✸ **Increases the outward reflective power of the UV lamps.**

✸ **Directs light out and down to increase overall effectiveness.**

✸ **Unit keeps your establishment safe and free from flies carrying diseases such as Salmonella and E.coli.**

✸ **Cartridge holds 10 times the capacity of a glue board. The auto advancing cartridge system rolls the trapped flies inside the cartridge so you never handle the fly covered trapping surface.**
