

# TEMPAPER®

SELF-ADHESIVE. REPOSITIONABLE. REMOVABLE. WALLPAPER.

## TEMPAPER DESCRIPTION

Tempaper is self-adhesive, removable wallpaper that eliminates the need for paste or water. Simply remove its backing and adhere to a primed and painted surface. Just peel off to remove. It is fun and high-impact decorating for those who do not want to make a long-term commitment to a permanent design .

## ROLL SIZE

**Tempaper** is sold in 1 roll of 20.5" x 33' or 11 yards, 56.37 sq. ft.

## SURFACE PREPARATION

Tempaper is recommended for smooth surfaces that are in good condition. Tempaper may be applied to any primed and painted surface such as walls, doors, interiors, or wherever your creative mind takes you. You can even apply Tempaper to furniture and shelves that have been painted or have a laminate finish.

It is recommended that you apply Tempaper to surfaces that have been painted with a satin or semi-gloss finish. Applications on matte or flat paints and textured surfaces are not recommended. It is recommended that you avoid exposing Tempaper to prolonged heat from direct light sources.

## APPLICATION

We suggest using a squeegee to smooth out any air pockets. It is recommended that you avoid forcing the product to the surface. Start from the middle of the piece you are smoothing and guide the air out to the sides. Please do not pull too hard on the product. It is recommended that you slightly overlap (approx. 1/16th") from panel to panel to avoid splitting seams in environments that can be subjected to temperature variances.
