

Divider and pusher on installation tape rails.

TF10129

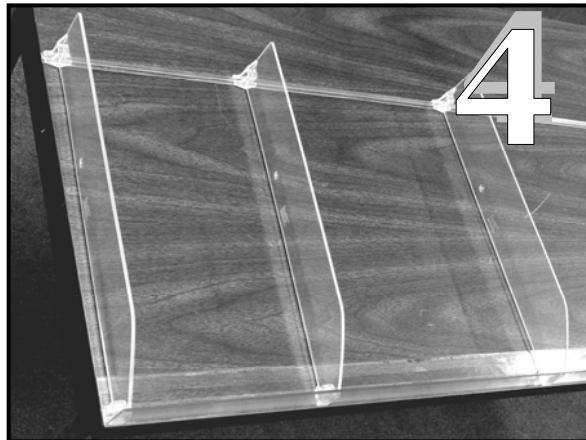

- Items:
1 – FRONT RAIL AND PRODUCT STOP
2 – PUSHER
3 – DIVIDER
4 – BACK RAIL

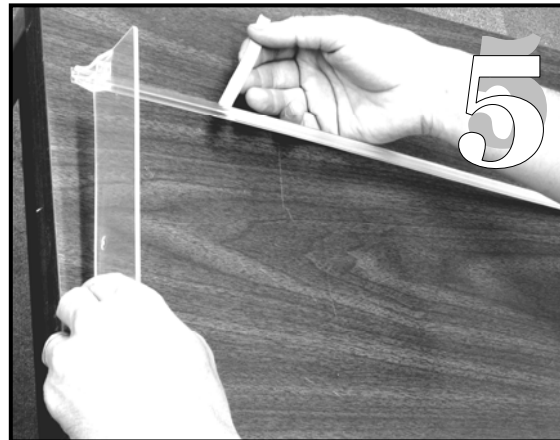

Remove protective film from FRONT RAIL.

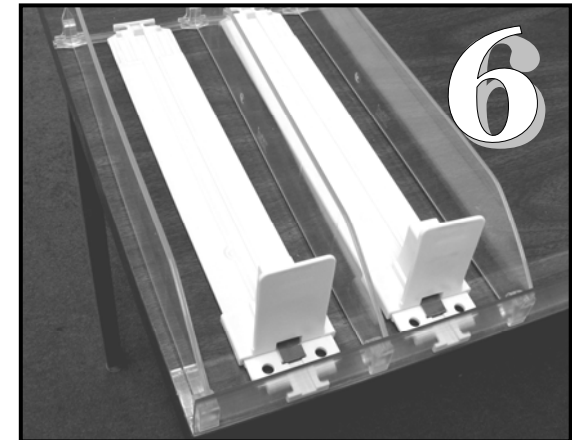

Remove backing from tape and stick the front rail at the front edge of the shelf. Press firmly in place.

Snap dividers to the front rail and snap the back rail in place under the dividers at the back. Use five or six dividers across the shelf.

Lift the BACK RAIL and remove the adhesive backing, then press the back rail to the shelf firmly.

Slide or move the dividers to desired location and snap in the pushers to suit product width.
