

LIQUID AND CHEMICAL PROTECTION • WATERPROOF • SUPERIOR GRIP

Designed to stand up to a variety of cleaning tasks

**UTILITY
GLOVE**

High-performance, multi-purpose hand and arm protection designed for use at pot sinks, dish machines, or when using cleaning products. Superior choice over rubber or neoprene.

**TUCKER
UTILITY GLOVE**

- Tough, but flexible, fully coated nitrile utility glove provides maximum hand protection from solvents, oils, greases and cleaning products
- This hardworking glove provides superb dexterity and comfort for easy movement and extended wear in commercial foodservice environments
- Design, fit and grip in even the most oily and wet applications make this glove perfect for any foodservice cleaning task
- Textured finish for confident grip in wet or dry applications
- 100% cotton interlock lining for comfort, absorption, temperature protection, and durability

STRUCTURAL INTEGRITY up to 400°F (204°C) at intermittent exposures

COST EFFECTIVE reusable hand protection that lasts longer than unsupported or disposable gloves

APPROVED FOR DIRECT FOOD CONTACT: Compliant with FDA's 21 CFR, parts 170-199

PROTECTION: Chemical • Liquid/Steam Cut/Puncture • Abrasion • Tear

Interior/Exterior
RINSES CLEAN at sink

Tucker Utility Glove

Best use:

All purpose hand and arm protection designed for use around lower temperatures, or when using cleaning chemicals.

- 13" length is great when cleaning steam table bays, grill surfaces, griddle surfaces or hot holding equipment where wearers are not reaching into cabinet.
- 20" length works best when full arm protection is needed for reaching into fryer vats, washing dishes at the sink or submerging hands in cleaning solutions.

Right Application:

When there is potential risk of prolonged exposure to cleaning products, solvents, hot grease, hot water, food soils, bacteria or where there is increased risk of contact dermatitis.

Equipment/Surface:

Pot sinks, dish machines, mop pits, undershelves, product holding units, storage areas/shelving, building exterior

Benefits/Attributes of Tucker Utility Glove:

GLOVE OF CHOICE for wearers who require superior protection, maximum comfort, and flexibility in a long-sleeved glove.

COMFORTABLE COTTON INTERLOCK LINER WITH STEAMGUARD™ BARRIER for added strength and resistance to abrasions, cuts and punctures.

CONSTRUCTED FROM HIGH QUALITY NITRILE which offers flexibility, touch sensitivity and dexterity not found in heavier-mil utility gloves; Nitrile is resistant to oils and fats in the body, so it significantly reduces risk of allergy.

TEXTURED FINISH FOR SUREGRIP™ SUPPORT in oily and wet applications.

MADE FROM COMPONENTS THAT COMPLY WITH FDA 21CFR, parts 170-199, making the Tucker Utility Glove safe for food contact.
