

### **When You Order:**

---

1. Measure Door (a standard door measures 42 x 92).
2. Determine Style (for example, a Personnel Door).
3. Select Size — The closest Personnel Door to your door size of 42 x 92 is 46 x 96.  
Allow approximately 4" width and 5" height for the proper overlap to seal and mount door correctly.

## Types of Mounts

- A. Flat Wall – tough, reliable method of installation. Heavy aluminum bar passes through banded loops to be bolted above door jam. Is standard on all 8” Heavy Duty doors unless otherwise specified.
- B. Easy Slid Wall – Each strip slides into aluminum mounting to create a strong, secure hanging system. Standard on all 6” Light Duty and 4” Personnel doors unless otherwise specified.
- C. Overhead – Used where there is overhead obstruction or lack of support for wall mount.
- D. Round Bar- Used where no overhead support or obstruction prohibits use of other styles of mounts.
