2.5 Quart Batch Bowl Food Processor – WFP11S

Waring® Commercial Food Processors

This food processor line features the same performance and reliability you have come to trust in Waring® Commercial. With over 70 years in the commercial food service business, backed by 300 service centers and a growing list of accessories, Waring delivers value as well as great food results. Along with standard processing discs and blade, this line features the new LiquiLock™ Seal System that holds liquids in the bowl while processing and keeps the S-blade in the bowl while pouring! With these added benefits, the WFP11S has unparalleled versatility that no kitchen should do without.

Important Features

- Sealed, clear-view 2.5-qt batch bowl – Process soups, sauces, marinades and more, without leaks. You'll know when it's done because you'll see it. Our high-impact, unbreakable and scratch-resistant polycarbonate lets you see into the bowl, and it's durable too. Put the bowl in your dishwasher when you're done, or hand-wash it if you like. It's lighter than metal, but it's built for tough use and has a single handle for easy lift and balance.
- Exclusive new accessories!
 - Sealed S-blade with LiquiLock™ Seal System – Blade locks in place for easier, safer pouring. Will chop, mince, purée, liquefy, and more, while minimizing spillage.
 - Sealed Whipping Disc – Make your own whipped cream, crème fraîche, butter, and more! The sealed whipping disc is a one-of-a-kind tool to help you whip up batches quickly and with little effort.
 - Reversible Shredding Disc – 2 discs in 1! With the reversible shredding disc you can process with either a fine shredding disc or medium shredding disc without having to buy and store 2 discs!
 - Adjustable Slicing Disc – Why buy 16 discs when you can buy 1 that does it all? The adjustable slicing disc allows you to select 16 different thicknesses from 2 mm to 4.5 mm.
- Easy ON and PULSE/OFF control paddles – All our models have them and you wouldn't want them any other way. Better than constantly pushing the START and STOP buttons, the PULSE is perfect for fine-tuning the chop or breaking down heavy loads.
- Carbon steel metal drive shaft – Heavy-duty construction for professional performance; built to last.
- Extra-large feed chute/funnel and food pusher – A large tube reduces preparation time. The feed tube keeps a steady supply of food coming down the chute. Or, use the small food pusher for shorter shreds and slices. The large pusher also acts as the small pusher's feed tube!
- Slice, shred, mix, purée and chop! – Quality accessories make the WFP11S versatile enough for any food processing job, with the convenience of a detachable stem to switch tasks with ease.

Safety Features

- Thermal overload protection – Protects motor from damage from overuse and heavy-duty loads.
- Sealed S-blade that locks into bowl – Pour liquids out, keep the blade in! LiquiLock™ Seal System allows you to pour processed food out of the batch bowl while keeping the blade safely attached.
- Safety interlock system – Machine will not operate unless all parts are securely in place.
- **Warranty – Best in Industry! – Limited Five Year Motor, Two Year Parts and Labor.**
