

**DESIGN:** Hybrid epoxy and polymer shelving. Smooth, vented, open grid surface allows free air circulation and minimal dust build up. Polymer mats can be easily removed for cleaning by hand or industrial dish washer.

**CONSTRUCTION:** All welded wire shelf frames and posts are constructed of heavy-gauge carbon steel or Type 304 stainless steel.

**FINISH:**

- **Antibacterial Blue** - is an ideal solution for high humidity, wet, or walk-in-cooler applications. The carbon steel is treated with an iron phosphate and the powder coated epoxy is electrostatically applied, baked and cured to a hard surface. Antimicrobial additive. 15-year limited warranty (limited against rust and corrosion)
- **Polymer Mat** - is ideal for all applications. The polymer composition offers prolonged durability and is impact resistant. Shelf mats will not chip, rust or corrode. Limited lifetime warranty (limited against rust and corrosion).

**QUICK, EASY ASSEMBLY:** Posts have a double groove visual guide feature every 8", circular grooves at 1" increments, and are numbered at 1" intervals. Tapered split sleeve snaps together around each post. Tapered openings in the shelf corners slide over the tapered split sleeves providing a positive lock. Shelf is assembled in minutes without the use of any special tools.

**ADJUSTABLE:** Shelves can be adjusted at 1" intervals along length of the post.

**WIRE TRUSSES:** Architectural wire trusses increase shelf capacity.

**TOP PLASTIC MAT:** Durable polymer composition withstand high temperatures and daily rigorous usage.

**INTERCHANGABLE:** Posts and shelves are compatible with the industry standard wire shelving.

**SHELF ACCESSIBILITY:** Shelves can be loaded/unloaded easily from all sides. This open construction allows maximum use of storage capability and accessibility.

**ADJUSTABLE FOOT:** 3/8-16 leveling bolt compensate for irregular floor surfaces.

**NSF APPROVED:** Antimicrobial additive protects the epoxy coating from bacteria, mold and mildew, that causes stains, odors and product degradation.
