

Double Wall French Press

MADE FROM 18/8 STAINLESS STEEL

How to Use a French Press

1. Warm press before use. Fill with the appropriate amount of medium ground coffee or tea. (Depending on preferred strength, use 2–3 tsp. for every 6 oz. of water.)
2. For best results, fill with water that has just come to a boil. Place lid on a steep.
3. After the grounds or tea leaves have settled towards the bottom (approximately 3–5 minutes), push the filter down.
4. Pour into your favorite mug or teacup and enjoy!
